Euronext Developed Indices

Developed World

The Euronext Developed World Index is designed to represent performance of a set of large and mid-cap stocks across 23 developed markets. The Index covers at least 85% of the free float market capitalisation of global developed markets and across each country.

List of eligible countries (23)			
Australia	France	Japan	Spain
Austria	Germany	Netherlands	Sweden
Belgium	Hong Kong	New Zealand	Switzerland
Canada	Ireland	Norway	United Kingdom
Denmark	Israel	Portugal	United States
Finland	Italy	Singapore	

The index is calculated in euro and rebalanced semi-annually.

The constituents of the index are weighted according to their free float market capitalisation ensuring replicability through liquidity screening.

Reference benchmarks

Euronext has also launched a broader suite of indices covering 85% of the floating market capitalisation of their respective universe. These indices are following the same principles as the Euronext Developed World Index.

- Euronext Developed Europe Index
- Euronext Developed Eurozone Index
- Euronext Developed North America Index
- Euronext Developed Asia Pacific Index
- Euronext Developed Asia Index
- Euronext Developed Pacific Index
- Euronext USA Index
- Euronext Canada Index
- Euronext Japan Index
- Euronext Switzerland Index
- Euronext UK Index

The Euronext Developed suite of indices offers standard large-cap, mid-cap and investable market indices.

Global Coverage

The Euronext Developed indices provide exposure to the world's leading developed markets. Our indices intend to represent the dynamism of the global economy offering a diverse array of investment opportunities, covering 23 developed countries.

Free Float Market Capitalisation

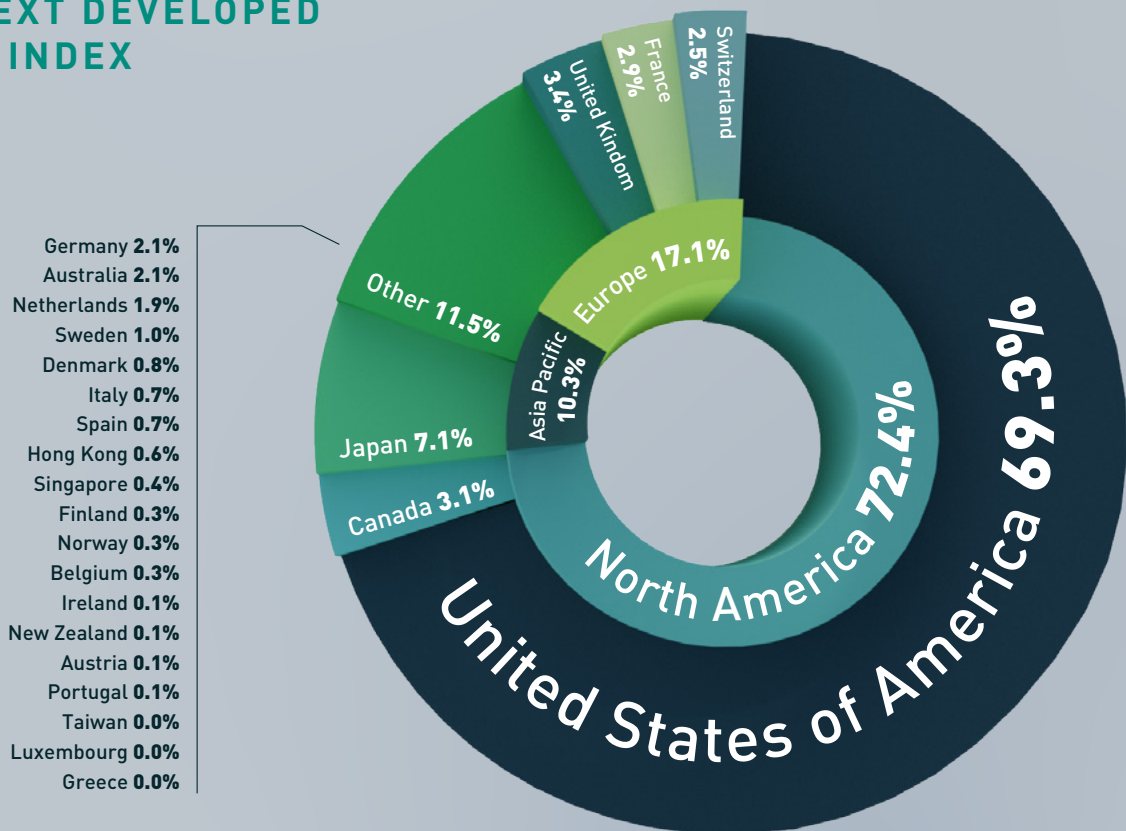

The Euronext Developed indices are selecting and weighting companies based on their Free Float Market Capitalisation. Focusing on companies' public ownership ensures the fair representation of the benchmark. It provides a more accurate reflection of market movements and stocks actively available for trading in the market.

Transparent Methodologies

The suite of indices follows a transparent methodology that guarantees the reliability and accuracy of the benchmark. Transparency regarding users should therefore be the main tool for market players to make an informed choice of the benchmarks they consider appropriate for their use.
