

# Euronext Proximity Services

# The Euronext Proximity Service

Go-live:  
H2 2023

## Background

Euronext wants to leverage its presence in the Bergamo Data Centre (Aruba IT3) to develop a Euronext technology hub allowing Clients to host more of their infrastructure near Euronext Markets

## General Overview

Euronext Proximity Services provides a space in the Bergamo Data Centre (Aruba IT3) to host Client's infrastructure which is not latency sensitive when accessing Euronext markets

The proximity space represents an extension of the colocation area i.e. It is **only available to Clients who already have a presence in the Euronext designated colocation area**

The Proximity service is accessible by Clients through the connectivity they already have in place with their cabinets in the colocation room or, through new geographical links directly connected to their cabinets in the proximity area

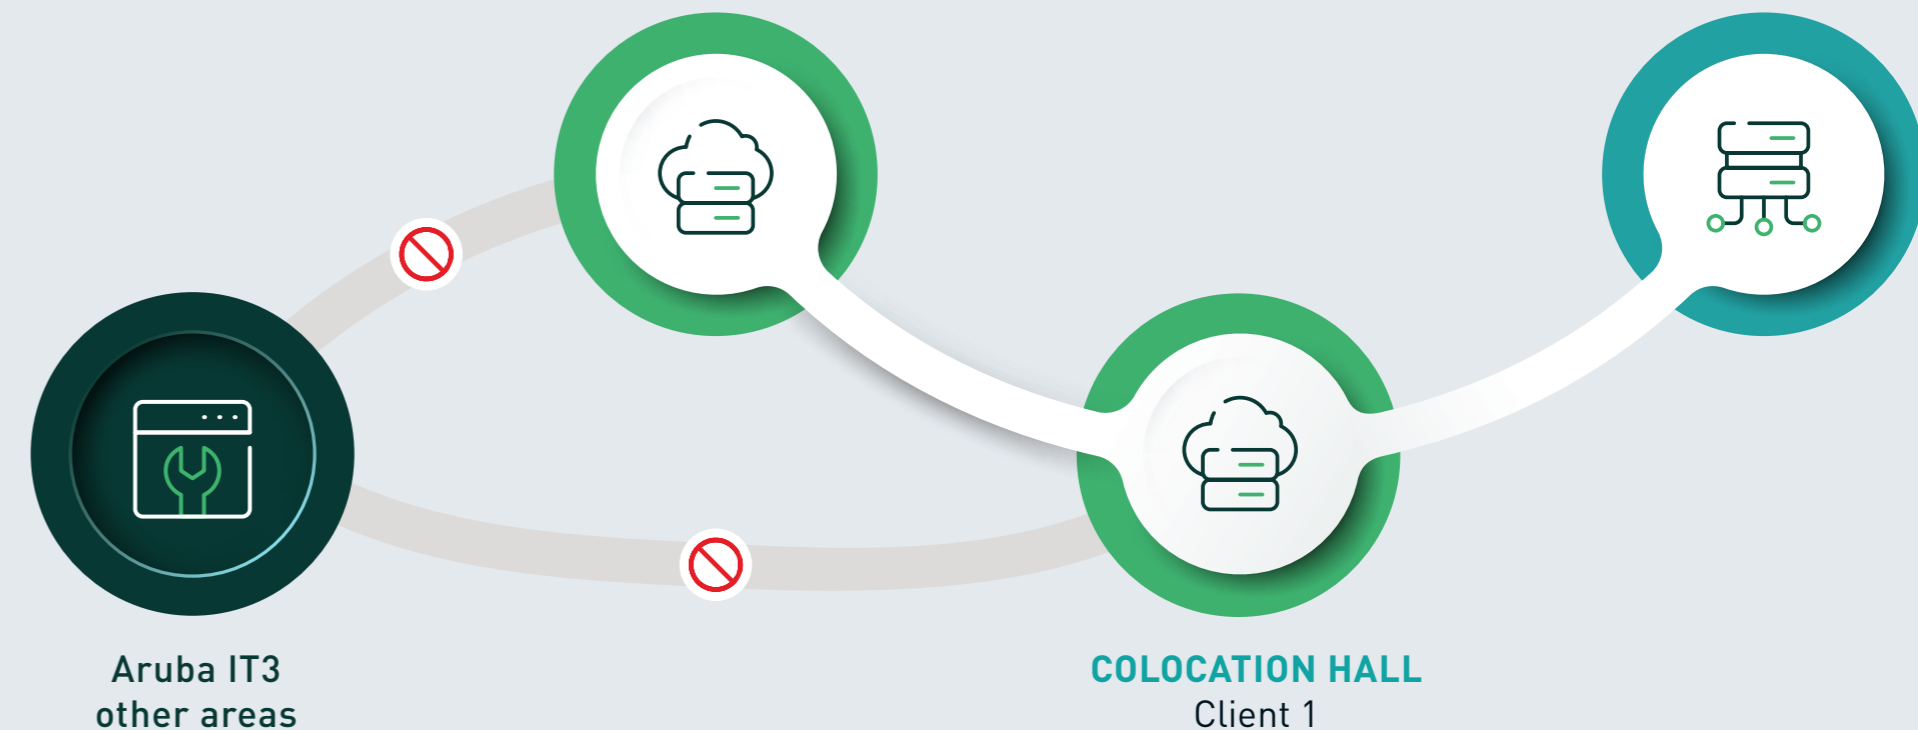

# Access to the Euronext Proximity area

# Product offering and pricing

## Value Proposition

This service is available to any clients having a presence in the Euronext Colocation area, i.e.,

- Trading Members
- Non-Trading Members
- Service Providers
- Clients behind a Service Provider (SP) on the basis that they use the same SP in the Proximity area

## Product Offering

- Cabinet Power available options: 4kW, 9kW
- No Power Non-Utilised (PNU) in Proximity
- Proximity pair of cross-connects between Client's Proximity and Colocation cabinets  
Please note that it is not mandatory to order additional FTEX

## Pricing approach

- Basic Fee: 50% of fixed Colocation cabinet price + 100% of variable energy related fee
- Installation one-off fee: €3,850 per cabinet (4 kW or 9 kW)

For other services in the colocation area, please refer to the Price List
