1. MAIN PRINCIPLES OF THIS GUIDE

1.1 FEE PER PRODUCT TYPE

Euronext's Cash Market trading fee structure is based on five product schemes. Section 2 of this guide provides further details on each of these schemes:

- Section 2.1 Equities & Rights
- Section 2.2 ETFs, ETVs and ETNs
- Section 2.3 Structured Products
- Section 2.4 Investment Funds (non-ETF)
- Section 2.5 Bonds
- Section 2.6 Cleared Borrowing & Lending Market (Equities & ETFs)
- Section 2.7 Euronext Block

1.2 ORDER AND TRADE FEES

1.2.1 Entry, modification and cancellation of orders

An order is counted when it is entered into the system, whether or not it is modified or cancelled afterwards.

An order can be modified or cancelled before execution, and also after partial execution. Modification of an order is equivalent to a cancellation followed by a newly entered order. The order is therefore counted twice, once at the first entry into the system and again at the new entry.

Charges are applied to certain complex order types, on either order entry or order execution.

There may be a charge for cancelling or modifying an order, depending on the market on which it was placed. Please see section 2 of the document for more information.

1.2.2 Execution and cancellation of trades

A trade cannot be modified. For those trades where a trade charge is applicable, the trade is charged upon execution, whether or not it is cancelled afterwards.

1.2.3 Cross trades and orders leading to them

In the case of cross trades, both legs of the trade are charged. Both orders leading to the trade are also charged for those products where an order charge is applicable. The relevant order and/or trade fee per product applies. This principle is the case for all products, whether traded on the Optiq, Saturn or the Trade Confirmation System (TCS).

1.2.4 Executed orders

Executed orders must have been executed during the same trading day. If an order is executed several times during the auction and continuous trading session it will be taken into account only once for each trading mechanism.

An executed order is:

- Passive, when the first execution of the order is passive;
- Aggressive, when the first execution of the order is aggressive;
- Executed in auction, when first execution of the order is in auction.

1.2.5 Order fees

Charges are applied to certain complex order types for Equities & Rights, ETFs, ETVs and ETNs, on either order entry or order execution. Specifically:

- Entered IOC orders cannot be combined with any other order type.
- The additional charge on Iceberg orders is not applied to unexecuted volumes. The additional charges apply to both the visible and the hidden executed volume originating from an Iceberg order.
- In the event that an Iceberg order is combined with another of the above order types (i.e., Stop/Stop-Limit orders), only the Iceberg surcharge of 0.15 bps will apply (the charges on Stop/Stop-Limit orders will not apply).
- Please see section 1.2.1 for details of charges for modification or cancellation of orders after entry.
- The cap per executed order, which applies to trading in Equities & Rights, does not apply to the fees for complex order types detailed above.

EQUITIES & RIGHTS, ETFs, ETVs AND ETNs ORDER FEES REGULATED CASH MARKETS¹

COMPLEX ORDER TYPE (NON-LP)	CHARGE
Executed Iceberg orders	0.15 bps
Dark LIS executed orders	0.15 bps
Executed Immediate-or-Cancel (IOC) and Fill-or-Kill (FOK) orders	€0.02
Entry of Stop and Stop-Limit orders	€0.30

For Equities and Rights trading only, a daily order/trade ratio of 100:1 continues to apply at member group level, above which orders are surcharged at €0.10.

Orders fees will not be charged to Eligible Firms (please refer to par. 1.3) on orders entered on Borsa Italiana securities until 31 March 2024.

When a Client requests a commercial gesture, incurred as a result of a breach of the daily order/trade ratio, in case of first occurrence per year (rolling basis), a partial refund (up to 50% discount) will be applied.

1.3 ELIGIBLE FIRMS

“Eligible Firms” are defined as:

- being active in at least one of the following asset classes on Borsa Italiana: Equities, ETPs, Fixed Income, Structured Products, and Equity and Index derivatives;
- having a ratio of activity (value/lots) between Borsa Italiana vs overall Euronext Group that exceeds 75% for each asset class in which they are active.

In the case that a participant is active in five asset classes, the ratio of 75% only needs to be met on a minimum of four asset classes.

For clients benefiting from Aggregation, as per paragraph 1.5 of this Guide, the ratio is calculated aggregating volumes at parent level.

1.4 FEE PRINCIPLES FOR NON-LP VS LP TRADES

This document explains the general fee principles of non-Liquidity Provider trades and non-Market Maker trades.

Details of Liquidity Provider and Market Maker trading fees are defined in the *Market Maker and Liquidity Provider Cash Trading Fee Guide*. For more information, please contact Euronext's Global Analytics department at MarketMaker@euronext.com

1.5 AGGREGATION¹

A trading firm with several member trading codes can amalgamate its subsidiary members for its trading in cash instruments. There is no further reduction for aggregation in addition to the benefits the member will receive from the fees charged on the total aggregated activity.

1.5.1 Requirements

Member codes of the same parent company can be aggregated provided that the 'master client' (who is not necessarily a member of Euronext) holds more than 95% of the subsidiaries to be aggregated.

Aggregation of members' codes with their clients' codes is not possible.

1.5.2 Procedure

For any additional requests, please contact the Onboarding and Membership Dept at EuronextMembership@euronext.com or contact your relationship manager.

¹ Aggregation is not applied to Eligible Firms.

2. PRODUCTS

2.1 EQUITIES & RIGHTS

2.1.1 Standard Equities Fees

Member groups may choose either Option 1 or Option 2 – A or Option 2 – B for all of their trading volumes on equities and rights. A member group may not choose separate Options for individual member codes. Member groups will be assigned Option 1 by default. To select Option 2 – A or Option 2 – B, member groups must inform Euronext in writing 5 business days before month end by sending the Cash Equity Non-LP tariff selection form to GlobalSales@euronext.com. The Option selected will then apply for the subsequent invoicing month.

OPTION 1	
Charge per executed order	€0.15
First €0.7bn executed (≤€0.7bn)	0.95 bps
Next €1.3bn executed (€0.7bn - €2.0bn)	0.70 bps

Next €24.5bn executed (€3.5bn - €28.0bn)	0.55 bps
All subsequent volumes (>€28.0bn)	0.45 bps

Notes:

1. The charge per executed order is not charged for Euronext Milan, Euronext Growth Milan, Euronext MIV Milan.
2. The charge per executed order is applied once, regardless of the number of individual trades generated from the original order as described in section 1.2.4.
3. The volume-based charges apply in addition to the fee per executed order and in addition to complex order fees in section 1.2.5. The volume thresholds are calculated on a monthly basis.

OPTION 2		
	Minimum charge per executed order	Variable charge
Option 2 - A - minimum commitment fee €275 000 (monthly)		
Blue-chip continuous trading	€0.60	0.10 bps
Other	€1.00	0.60 bps
Option 2 - B – no minimum commitment fee		
Blue-chips continuous trading	€1.00	0.20 bps
Other	€1.30	0.80 bps

Notes:

1. 'Blue-chip' stocks: components of CAC 40®, AEX 25®, BEL 20®, PSI 20®, SBF 120®, AMX®, ISEQ 20®, OBX 25®, FTSE MIB and rights. The list is automatically updated when there is any change in index components.
2. 'Other': auctions and all other securities outside of blue chips.
3. The above is charged in addition to complex order fees in section 1.2.5.
4. New trading members will have the possibility to select Option 2 – A without the minimum monthly commitment fee for a period of 12 calendar months (from the first working day of the month following the new membership's effective date on the Cash Equity markets). This is not applicable in the case of a new membership resulting from a transfer of activity or a new membership resulting from a cancellation within a 12-month period.

2.1.2 Tariff Selection

The Application Form to select Option 2 (A or B) is available online at euronext.com/trading-fees-charges. Otherwise, the member group will be assigned Option 1 by default. Application Forms must be returned to GlobalSales@euronext.com 5 business days before month-end.

2.1.3 Retail Systematic Internaliser Routed Orders

There is no specific fee scheme for members' orders sent to Euronext's regulated cash markets when they originate and are routed from active retail-focused Systematic Internaliser Platforms operated by a member.

2.1.4 Retail Member Organisations

Retail Member Organisations (RMOs) may choose to benefit from the following fee grid. The fees in the table below apply to the RMO volumes traded on all Equities and Rights (continuous and auction trading). In order to benefit from it, member groups must contact their relationship manager at GlobalSales@euronext.com and confirm in writing 5 business days before month end. The Retail Member Organisation fee grid will then apply for the subsequent invoicing month.

RETAIL MEMBER ORGANISATION	
Charge per executed order	€0.00
First €0.50bn executed (\leq €0.50bn)	0.95 bps
Next €0.50bn executed (€0.50bn - €1.00bn)	0.70 bps
Next €0.50bn executed (€1.00bn - €1.50bn)	0.63 bps
All subsequent volumes ($>$ €1.50bn)	0.55 bps

Notes:

1. 'Retail Member Organisations' or 'RMOs': pursuant to Euronext Rules and notice n° 4-01 of the Trading Manual.
2. Should a member groups under the Option 1 of the standard Equities fee grid have both RMO and non-RMO flow, the RMO volumes still contribute to the member group's volumes for the calculation of the appropriate variable basis point charge, resulting in an average basis point charge which will be used to invoice the non-RMO activity.
3. The above is charged in addition to complex order fees in section 1.2.5.
4. Such member groups will not be eligible for any other incentive or award schemes.

In addition, eligible clients may benefit from two additional options:

- Option 1 - Retail fee cap: Trading fee capped at €200,000, however an average fee of at least 0.55pb would apply over the total monthly turnover.
- Option 2 - Large Retail Member Organisation: Applicable to companies with an average daily RMO and non-RMO turnover in excess of €750,000,000 in the previous calendar year on the overall cash equity market. On the existing fee per "client group", eligible clients may request to apply the following: a 65% discount on the fees charged on aggressive orders AND a 10% additional charge on passive flow. The percentage of aggressive and passive will be determined based on the percentage of volume in euros from aggressive and passive flow.
- Option 3 - Zero commission on aggressive flow for liquid stocks: applicable to clients with more than 40% of their RMO volumes being aggressive and on blue chips stocks in the previous calendar quarter. Eligible clients may request to apply to a removal of the trading fees on the RMO aggressive flow on blue chip stocks. For new Euronext members, the percentage of aggressive flow on blue chip stocks will be observed during the first month of activity after the onboarding. Participants having opted to option 3 - whose quarterly market share on Best of Book would fall by more

than 20% vs the previous 12 months market share will be excluded from this fee option.

Notes:

1. 'Blue-chip' stocks: components of FTSE MIB®, CAC 40®, AEX 25®, BEL 20®, PSI 20®, SBF 120®, AMX®, ISEQ 20®, OBX 25® and rights. The list is automatically updated when there is any change in index components.
2. "Aggressive flow": including opening, closing and intraday auction phases. This flow will be excluded from the calculation of the standard RMO fees volume thresholds.

2.1.5 Proprietary trading firms

2.1.5.1 ‘Omega 2’: for non-member proprietary flow

Eligible participants for ‘Omega 2’ pilot fee scheme must trade more than €2 billion per month in the continuous trading session on Euronext’s equity markets (all shares, excluding Euronext Milan, Euronext Growth Milan, and Euronext MIV Milan). For new participants, this threshold will be reduced to €500 million for the first nine months of their activity under the scheme.

Omega 2 fees apply to continuous trading on approximately 110 of the most liquid stocks on Euronext. The list of Omega 2 eligible stocks is available on request and on Euronext’s website.

- Non-member proprietary firms wishing to participate in the Omega pilot scheme will enter into a tripartite arrangement with Euronext and the member intermediary;
- Volumes executed through pack Omega will continue to count toward the volume tiers of the member intermediary;
- ‘Proprietary trading’ is used in the context of the Pack Omega pilot fee scheme and tri-partite arrangement to encompass volume from hedge funds and other entities, where the order is initiated by the entity itself and for its own account;
- The member intermediary will remain legally responsible for the transmission of orders to Euronext and for all relevant risk controls, as today;
- The member firm will technically segregate the flow of the non-member through dedicated SLE sessions or a dedicated client order ID in the order message;
- The scheme remains broker-agnostic. In the event that two or more member intermediaries route flow from the same firm, Euronext will invoice each member separately in proportion to the volumes of the underlying firm routed via the member. The underlying firm’s volume can be aggregated across multiple brokers.

The following fees will apply to activity in the continuous trading session on Omega 2 eligible shares, provided that the volume threshold is met:

OPTION 1	MINIMUM FEE PER EXECUTED ORDER	VARIABLE CHARGE PER EXECUTED ORDER
	€0.30	0.30 bps

or

OPTION 2	SUBSCRIPTION PRICE	€150,000 per month

Note that this pricing model only applies to:

- Proprietary trading flow;
- Trades executed during the continuous trading session on Omega 2 eligible shares.

2.1.5.2 ‘Prop Pack’: for member proprietary flow

The “Prop Pack” is a fee scheme dedicated to member proprietary trading firms only. The Prop Pack contains a number of options, composed of a subscription price for an amount of value traded and a fee for volumes in excess of this purchased amount.

The Prop Pack offers the following pricing:

		Option			
		PP <i>Prop Pack</i>	PP+ <i>Prop Pack - Plus</i>	EPP <i>Extended Prop Pack</i>	EPP+ <i>Extended Prop Pack Plus</i>
Criteria	Stock universe*	Blue-chips	Blue-chips	Blue-chips + SMEs	Blue-chips + SMEs
	Trading phase	Continuous	Continuous + auction	Continuous	Continuous + auction
	Volumes threshold	€3bn	€6bn	€6bn	€9bn
Fees	Subscription price	€100k	€200k	€220k	€350k
	Subsequent volumes	Eligible	€20k / €500m volumes tranche		
		Non-eligible	0.75bps		

* The Stock universe does not include Euronext Milan, Euronext Growth Milan, and Euronext MIV Milan securities.

For new participants to the Prop Pack, a six-months transition period will be granted during which the lowest pricing between the current member option and the selected Prop Pack will apply.

A member may move onto the RFP subject to one month’s notice to Euronext. If the member wishing to enter the programme shows interest intra-month, Euronext will provide i) at least 6 months of historical data on the client’s activity (on both its market share and average trade size – as computed for the RFP eligibility) and ii) guidance around the client’s eligibility to the programme.

The member who notifies Euronext its intention to opt-in the RFP will be accepted by Euronext only if it fulfils the eligibility criteria, and will benefit from the fees from the beginning of the next month as long as it meets the eligibility criteria.

¹ As described in article 4402 of the Euronext Rule Book I, guaranteed order book cross-trades result from a cross order entered into the order book which specifies both the buyer and seller. These orders are permitted by the order book system during continuous trading when the price is within the best bid offer (BBO), inclusive of boundaries.

² the monthly average size of all RMO-flagged orders sent by the Retail Package participant, measured at the moment of their introduction on the order book. Partial execution of the order is taken into account only if the participant updates the remaining order quantity after the partial execution. In this case the sizes (i) of the initial order sent by the RMO and (ii) of the remaining order quantity resulting from the partial execution of this order and updated subsequently by the participant after the partial execution as well as (iii) of any other subsequent update(s) of this remaining order quantity will be taken into consideration as distinct sizes for the purpose of the calculation. Average size is rounded to the nearest whole Euro for monitoring and invoicing purposes.

³ Numerator: RMO-flagged turnover sent by the Retail Package participant on ETF & Denominator: Euronext ETF turnover
RMO market share is expressed as a percentage and rounded to two decimals for monitoring and invoicing purposes (for example 1.276% would be rounded to 1.28%).

4. **Block trades and other negotiated trades** are reported via the Trade Confirmation System (TCS). An ad-valorem fee of 0.15 bps is applicable per trade side with a minimum of €0.75 and a maximum of €45.00. A monthly cap of €1,000 per member is applicable.

5. **NAV trades** are trades executed via the NAV Trading Facility¹. An ad-valorem fee based on the transaction size is applicable for every trade. This ad-valorem fee is set at 2 bps per trade, with a minimum and maximum fee per trade: the floor is €2.30 per trade, the cap is set at €45 per trade. Above 15,000 transactions a month, the minimum fee per trade is further reduced to €2.00 per trade.
