Amsterdam, Brussels, Dublin, Lisbon, Milan, Oslo and Paris – 11 June 2024 – Euronext today announced the results of the annual review of the Euronext Tech Leaders segment, leading to 11 new companies joining the segment. These companies, recognised for their significant growth, span various Tech industries including Biotech, MedTech, Pharmaceuticals, Electronics, Hardware and Robotics, Software, and Technology Advisory. The Euronext Tech Leaders index will be updated after markets close on Friday 21 June 2024 with effect from Monday 24 June 2024. The Euronext Tech Leaders segment is reviewed annually, with the next review due to take place in June 2025.

Launched by Euronext in June 2022, the Euronext Tech Leaders initiative builds on Euronext's vibrant Tech ecosystem and longstanding commitment to technology companies. Euronext created the Euronext Tech Leaders segment, which now contains more than 110 European companies listed on Euronext markets, as well as an index tracking the stocks in the segment, and a dedicated set of services for listed and private Tech companies.

In its first two years, more than 30 companies have joined the Euronext Tech Leaders segment, and four companies entered the segment following a listing on Euronext since last year's review: Arverne Group, Exosens, Planisware and Pluxee.

**Stéphane Boujnah, CEO** and Chairman of the Managing Board of Euronext, said: "Euronext is the leading equity listing venue for Tech in Europe, with close to 750 listed Tech companies, representing an aggregated market capitalisation of €1.4 trillion. The Euronext Tech Leaders segment for high-growth Tech companies celebrates its two-year anniversary with the inclusion in the segment of 11 new companies that come from five European countries. Euronext welcomes the new Euronext Tech Leaders members and we look forward to continuing to support their growth story. Through their leadership and their disruptive innovation, the members of the Euronext Tech Leaders segment strengthen Europe's strategic position and competitiveness in the global technology industry."
