1. Main principles of this guide

1.1 Fee per product type

Euronext's Cash Market trading fee structure is based on seven product schemes. Section 2 of this guide provides further details on each of these schemes:

- Section 2.1 Equities & Rights
- Section 2.2 ETFs, ETVs and ETNs
- Section 2.3 Structured Products
- Section 2.4 Investment Funds (non-ETF)
- Section 2.5 Bonds
- Section 2.6 Cleared Borrowing & Lending Market (Equities & ETFs)
- Section 2.7 Euronext Block

1.2 Order and Trade fees

1.2.1 Entry, modification and cancellation of orders

An order is counted when it is entered into the system, whether or not it is modified or cancelled afterwards.

An order can be modified or cancelled before execution, and also after partial execution. Modification of an order is equivalent to a cancellation followed by a newly entered order. The order is therefore counted twice, once at the first entry into the system and again at the new entry.

Charges are applied to certain complex order types, on either order entry or order execution.

There may be a charge for cancelling or modifying an order, depending on the market on which it was placed. Please see section 2 of the document for more information.

1.2.2 Execution and cancellation of trades

A trade cannot be modified. For those trades where a trade charge is applicable, the trade is charged upon execution, whether or not it is cancelled afterwards.

1.2.3 Cross trades and orders leading to them

In the case of cross trades, both legs of the trade are charged. Both orders leading to the trade are also charged for those products where an order charge is applicable. The relevant order and/or trade fee per product applies. This principle is the case for all products, whether traded on the Optiq, Saturn or the Trade Confirmation System (TCS).

1.2.4 Executed orders

Executed orders must have been executed during the same trading day. If an order is executed several times during the auction and continuous trading session it will be taken into account only once for each trading mechanism.

An executed order is:

- Passive, when the first execution of the order is passive;
- Aggressive, when the first execution of the order is aggressive.

1.2.5 Order fees

Charges are applied to certain complex order types for Equities & Rights, ETFs, ETVs and ETNs, on either order entry or order execution. Specifically:

- Entered IOC orders cannot be combined with any other order type.
- The additional charge on Iceberg orders is not applied to unexecuted volumes. The additional charges apply to both the visible and the hidden executed volume originating from an Iceberg order.
- In the event that an Iceberg order is combined with another of the above order types (i.e., Stop/Stop-Limit orders), only the Iceberg surcharge of 0.15 bps will apply (the charges on Stop/Stop-Limit orders will not apply).
- Please see section 1.2.1 for details of charges for modification or cancellation of orders after entry.
- The cap per executed order, which applies to trading in Equities & Rights, does not apply to the fees for complex order types detailed above.

EQUITIES & RIGHTS, ETFs, ETVs AND ETNS ORDER FEES REGULATED CASH MARKETS

COMPLEX ORDER TYPE (NON-LP)	CHARGE
Executed Iceberg orders	0.15 bps
Executed Immediate-or-Cancel (IOC) and Fill-or-Kill (FOK) orders	€0.02
Entry of Stop and Stop-Limit orders	€0.30

Order fees are not charged to:

- ETF Borsa Champions on Borsa Italiana ETFs, ETVs and ETNs;
- Equity Borsa Champions on Borsa Italiana Equity securities;
- All Clients on EuroTLX Equity, Euronext Global Equity Market (Euronext GEM) and TAH.

For Equities & Rights trading only, a daily order/trade ratio of 100:1 continues to apply at member group level, above which orders are surcharged at €0.10. This is not applied to Equities on Euronext GEM, TAH and EuroTLX and to Equity Borsa Champions on Borsa Italiana Equity securities.

- When a Client requests a commercial gesture, incurred as a result of a breach of the daily order/trade ratio, in case of first occurrence per year (rolling basis), a partial refund (up to 50% discount) will be applied.

1.3 Fee principles for non-LP vs LP trades

This document explains the general fee principles of non-Liquidity Provider trades, Non-Specialist trades and non-Market Maker trades.

Details of Liquidity Provider and Market Maker trading fees are defined in the *Market Maker and Liquidity Provider Cash Trading Fee Guide*. For more information, please contact Euronext's Global Analytics department at MarketMaker@euronext.com

1.4 Aggregation¹

A trading firm with several member trading codes can amalgamate its subsidiary members for its trading in cash instruments. There is no further reduction for aggregation in addition to the benefits the member will receive from the fees charged on the total aggregated activity.

1.4.1 Requirements

Member codes of the same parent company can be aggregated provided that the 'master client' (which is not necessarily a member of Euronext) holds more than 95% of the subsidiaries to be aggregated.

Aggregation of members' codes with their clients' codes is not possible.

1.4.2 Procedure

For any additional requests, please contact the Onboarding and Membership Dept at EuronextMembership@euronext.com or contact your relationship manager.

1.5 Subscription fees to EuroTLX market

An annual subscription fee to the EuroTLX market is charged according to the role undertaken by the member firm as follows:

- Intermediary – not on principal basis: €15,000/year
- Intermediary – on principal basis: €5,000/year

Discounts on EuroTLX subscription offered to intermediaries:

- If a firm is both an Intermediary *on principal basis* and also an Intermediary *not on principal basis*, the annual subscription fee is reduced by a half.

¹ Aggregation is not applied to Eligible Firms.

- If an Intermediary on principal basis is also a Market Maker², the Intermediary annual subscription fee is waived.
- New Intermediaries are exempted from paying the annual fee for the first six months from their admission. If the expiration of the waiver does not coincide with the start of a new fiscal year, the annual subscription fee is charged the following month on a pro-rata basis.
- The waiver does not apply if the new access is due to a transfer of activity, or in the case of firms cancelling their access subscription and then reapplying in the course of 12 months.
- New Intermediaries that are already members of Euronext Amsterdam, Euronext Brussels, Euronext Lisbon, Euronext Paris are exempted from paying the annual subscription fee for the first year from their admission. If the expiration of the waiver does not coincide with the start of a new fiscal year, the annual subscription fee is charged the following month on a pro-rata basis. The waiver does not apply in the case that the new access is due to a transfer of activity or in the case of firms cancelling their access subscription and then reapplying in the round of 12 months.
- The following are not considered as new Intermediaries:
 - Companies or vehicles controlling the intermediary company that at the time of admission, or in the previous 3 years, has been a member of any market that is currently operated by EuroTLX.
 - Subsidiaries or vehicles controlled by the intermediary company that at the time of admission, or in the previous 3 years, has been a member of any market that is currently operated by EuroTLX.
 - Partner companies acting on behalf of and in agreement with the intermediary company that at the time of admission, or in the previous 3 years, has been a member of any market that is currently operated by EuroTLX.

The annual subscription fee for the EuroTLX market is charged at the beginning of the relevant year. For new subscribers the relative fee is determined *pro rata temporis* on a monthly basis from the completion of the admission to the market.

1.6 EuroTLX: Request for use of Error Management procedure

The error management procedure means the procedure described under Article 8.5 of the EuroTLX Market Rule Book.

- Fee for Order Book: €500
- Fee for RFQ: €1,000

Such fee shall be charged under Article 3.10, paragraph 1, for each request and independently of its outcome, in the month following such request.

² Please refer to Fee Book "Market Maker Liquidity Provider Trading Fee Guide Euronext Cash Markets".

2.1.1 Standard Equities Fees

Member groups may choose either Option 1 or Option 2 – A or Option 2 – B for all of their trading volumes on equities and rights. A member group may not choose separate Options for individual member codes. Member groups will be assigned Option 1 by default. To select Option 2 – A or Option 2 – B, member groups must inform Euronext in writing 5 business days before month end by sending the Cash Equity Non-LP tariff selection form to GlobalSales@euronext.com. The Option selected will then be applied for the subsequent invoicing month.

OPTION 1		
Charge per executed order	First 700,000 executed orders	€0.13
	Next 500,000 executed orders	€0.08
	All subsequent executed orders	€0.05

- The value-based charges apply in addition to the charge per executed order and in addition to complex order fees in section 1.2.5. The volume thresholds are calculated on a monthly basis.

OPTION 2		
	Minimum charge per executed order	Variable charge
Option 2 – A – minimum commitment fee		
€250,000 (monthly)		
Blue-chip continuous trading	€0.60	0.10 bps

Option 2 – B – no minimum commitment fee		
Blue-chip continuous trading	€1.00	0.20 bps

Notes:

- 'Blue-chip' stocks: components of CAC 40[®], AEX[®], BEL 20[®], PSI[®], SBF 120[®], AMX[®], ISEQ 20[®], OBX[®], FTSE MIB and rights. The list is automatically updated when there is any change in index components.
- 'Other': auctions and all other securities outside of blue chips.

3. The above is charged in addition to complex order fees in section 1.2.5.
4. New trading members will have the possibility to select Option 2 – A without the minimum monthly commitment fee for a period of 12 calendar months (from the first working day of the month following the new membership’s effective date on the Cash Equity markets). This is not applicable in the case of a new membership resulting from a transfer of activity or a new membership resulting from a cancellation within a 12-month period.

2.1.2 Tariff selection

The Application Form to select Option 2 (A or B) is available online at euronext.com/trading-fees-charges. Otherwise, the member group will be assigned Option 1 by default. Application Forms must be returned to GlobalSales@euronext.com 5 business days before month-end.

2.1.3 Euronext Mid-Point Match

The following fee grid is applied to Trading members using Mid-point Dark order type:

Euronext Mid-Point Match	
Pure Mid-point Dark order (interacting solely at the Mid-point of the Euronext Best Bid and Offer)	0.30 bps
Mid-Point Dark to Lit Sweep order (if the order is not immediately and fully executed, the remaining quantity of the order will switch from the Dark Order Book (DOB) to the Central Order Book (COB))	Standard Option Pricing*

*Regardless of where the execution take place (Dark Order Book, Central Order Book, or a mix of both), the order will be charged under the current Standard option of the member – the volume executed will count toward the value-based scheme tiers of the member group. Pure Mid-point Dark order volumes are not counting towards the volume-based tranches of the standard option.

An “early bird” period, valid until the end of September 2024, will be granted to new users of the service. During this period, no charges will be applied for Pure Mid-point Dark order executed passively.

2.1.4 Retail Systematic Internaliser Routed Orders

There is no specific fee scheme for members’ orders sent to Euronext’s regulated cash markets when they originate and are routed from active retail-focused Systematic Internaliser Platforms operated by a member.

2.1.5 Retail Member Organisations

Retail Member Organisations (RMOs) may choose to benefit from the following fee grid. The fees in the table below apply to the RMO volumes traded on all Equities and Rights (continuous and auction trading). In order to benefit from this RMO fee scheme, member groups must contact their relationship manager at GlobalSales@euronext.com and confirm in writing 5 business days before month end. The Retail Member Organisation fee grid will then apply for the subsequent invoicing month.

RETAIL MEMBER ORGANISATION

Charge per executed order	€0.00
First €0.50bn executed (\leq €0.50bn)	0.95 bps
Next €0.50bn executed (€0.50bn - €1.00bn)	0.70 bps
Next €0.50bn executed (€1.00bn - €1.50bn)	0.63 bps
All subsequent volumes ($>$ €1.50bn)	0.55 bps

Notes:

1. 'Retail Member Organisations' or 'RMOs': pursuant to Euronext Rules and notice n° 4-01 of the Trading Manual.
2. Should a member groups under the Option 1 of the standard Equities fee grid have both RMO and non-RMO flow, the RMO volumes still contribute to the member group's value traded for the calculation of the appropriate variable basis point charge of the value-based charge, resulting in an average basis point charge which will be used to invoice the non-RMO activity.
3. The above is charged in addition to complex order fees in section 1.2.5.
4. Such member groups will not be eligible for any other incentive or award schemes.

In addition, eligible clients may benefit from three additional options:

- **Option 1 - Retail fee cap:** Trading fee capped at €200,000; however an average fee of at least 0.55pb would apply over the total monthly turnover.
- **Option 2 - Large Retail Member Organisation:** Applicable to companies with an average daily RMO and non-RMO turnover in excess of €750,000,000 in the previous calendar year on the overall cash equity market. On the existing fee per "client group", eligible clients may request to apply the following: a 65% discount on the fees charged on aggressive orders AND a 10% additional charge on passive flow. The percentage of aggressive and passive flow will be determined based on the percentage of volume in euros from aggressive and passive flow.
- **Option 3 - Zero commission on aggressive flow for liquid stocks:** applicable to clients with more than 40% of their RMO volumes being aggressive and on blue-chip stocks in the previous calendar quarter. Eligible clients may request to apply for a removal of the trading fees on the RMO aggressive flow on blue-chip stocks. For new Euronext members, the percentage of aggressive flow on blue-chip stocks will be observed during the first month of activity after their onboarding.
- Participants choosing option 3 whose quarterly market share on Best of Book falls by more than 20% vs the previous 12 months' market share will be excluded from this fee option.

Notes:

1. 'Blue-chip' stocks: components of FTSE MIB[®], CAC 40[®], AEX[®], BEL 20[®], PSI[®], SBF 120[®], AMX[®], ISEQ 20[®], OBX[®] and rights. The list is automatically updated when there is any change in index components.
2. "Aggressive flow": including opening, closing and intraday auction phases. This flow will be excluded from the calculation of the standard RMO fees volume thresholds.

2.1.6 Proprietary trading firms

'Omega': for non-member proprietary flow

Eligible participants for the 'Omega' pilot fee scheme (also known as Omega 2) must trade more than €2 billion per month in the continuous trading session on Euronext's equity markets (all shares, excluding Euronext Milan, Euronext Growth Milan, and Euronext MIV Milan). For new participants, this threshold will be reduced to €500 million for the first nine months of their activity under the scheme.

Omega fees apply to continuous trading on approximately 110 of the most liquid stocks on Euronext. The list of Omega eligible stocks is available on request and on Euronext's website.

- Non-member proprietary firms wishing to participate in the Omega pilot scheme will enter into a tripartite arrangement with Euronext and the member intermediary;
- Should the member intermediary group be charged under Option 1 of the standard Equities fee grid, the value traded through Pack Omega will continue to count toward the value-based scheme tiers of the member intermediary group;
- 'Proprietary trading' is used in the context of the Pack Omega pilot fee scheme and tri-partite arrangement to encompass volume from hedge funds and other entities, where the order is initiated by the entity itself and for its own account;
- The member intermediary will remain legally responsible for the transmission of orders to Euronext and for all relevant risk controls, as today;
- The member firm will technically segregate the flow of the non-member through dedicated SLE sessions or a dedicated client order ID in the order message;
- The scheme remains broker-agnostic. In the event that two or more member intermediaries route flow from the same firm, Euronext will invoice each member separately in proportion to the volumes of the underlying firm routed via the member. The underlying firm's volume can be aggregated across multiple brokers.

The following fees will apply to activity in the continuous trading session on Omega eligible shares, provided that the volume threshold is met:

OPTION 1	MINIMUM FEE PER EXECUTED ORDER	VARIABLE CHARGE PER EXECUTED ORDER
	€0.30	0.30 bps

or

OPTION 2	SUBSCRIPTION PRICE
	€150,000 per month

Note that this pricing model only applies to:

- Proprietary trading flow;
- Trades executed during the continuous trading session on Omega eligible shares.

'Prop Pack': for member proprietary flow

The "Prop Pack" is a fee scheme dedicated to member proprietary trading firms only. The Prop Pack contains a number of options, composed of a subscription price for an amount of value traded and a fee for volumes in excess of this purchased amount.

The Prop Pack offers the following pricing:

		Option			
		PP <i>Prop Pack</i>	PP+ <i>Prop Pack - Plus</i>	EPP <i>Extended Prop Pack</i>	EPP+ <i>Extended Prop Pack Plus</i>
Criteria	Stock universe*	Blue-chips	Blue-chips	Blue-chips + SMEs	Blue-chips + SMEs
	Trading phase	Continuous	Continuous + auction	Continuous	Continuous + auction
	Volumes threshold	€3bn	€7bn	€6bn	€9bn
Fees	Subscription price	€100k	€250k	€220k	€350k
	Subsequent volumes	Eligible	€20k / €500m volumes tranche		
		Non-eligible	0.75bps		

* The Prop Pack PP+ and EPP+ Blue-chips include components of the FTSE MIB.

For new participants in the Prop Pack, a six-month transition period will be granted during which the lowest pricing between the current member option and the selected Prop Pack will apply.

2.1.7 Norwegian Local Champion

The Norwegian Local Champion scheme is dedicated to local Norwegian members that trade more than 80% of their volume on Norwegian securities. The eligible participant must be a registered direct Member of Euronext's markets and an authorised investment firm under MiFID. If the requirements are met, the following pricing will be applied for member groups who have selected this pricing. Otherwise, the Equity Option 1 will be applied by default.

Option A	Option B
0.70 bp	0.50 bp
no minimum commitment fee	minimum commitment fee: NOK 400,000 per month

In addition to this proposal, if Members are tagging their retail flow as RMO and thus participating in the Best of Book programme, the following pricing will be applied on all their flow (retail and professional flow):

Best Of Book Member - Option A	Best Of Book Member - Option B
0.65 bp	0.45 bp
no minimum commitment fee	minimum commitment fee
	NOK 400,000 per month

2.1.8 Irish Champion Programme

- The eligible participant must be a registered direct Member of Euronext's markets;
- It must be authorised as an investment firm under MiFID;
- The member must execute $\geq 90\%$ of its total volume on the Irish market;

OPTION 1 – IRISH CHAMPION PROGRAMME	
Charge per executed order	€0.15
First €14m executed (\leq €14m)	0.95 bps
Next €26m executed (€14m - €40m)	0.70 bps

Next €490m executed (€70m - €560m)	0.55 bps

- a. Eligible participants must be a registered Member of Euronext's markets whose volumes on a given 'local' market are at least 80% ³ of its total Euronext volumes (for cash equities, excluding Liquidity Provider "LP" and Retail Member Organisations "RMO" volumes);
- b. Once eligible, members must trade below the threshold of $<$ €400 million in monthly turnover.

Then, a fixed fee of 0.85 bps is applied on the whole traded amount at the end of the month⁴ at Group Member level.

- Intermediary on principal basis: 0.70 bps on the value traded with a minimum of €1.60 per trade.

A Minimum Monthly Activity Charge (MAC) of €1,000 is charged for intermediaries on principal basis. The MAC covers executions made on a principal basis on Bond-x, Cert-x and EuroTLX Equity¹⁰.

¹⁰ The MAC is calculated as the difference between €1,000 and the sum of the trading fees charged on Bond-x, Cert-x and EuroTLX Equity markets during the month, for the activity carried out on principal basis. The MAC is due even in the case that an Intermediary has subscribed to other different access profiles, and is based only on the Intermediary activity executed in an 'on principal' capacity.

2.2 Exchange Traded Funds (ETFs), Exchange Traded Vehicles (ETVs) & Exchange Traded Notes (ETNs)

2.2.1 Order fees

There is no charge for standard ETF, ETV, and ETN orders. Please see section 1.2.5 for details of charges for certain complex order types.

2.2.2 Trading fees

There are several types of trading methods, each with specific pricing; the following fees do not apply to Eligible Firms on Borsa Italiana securities.

For products not traded in Euros on Euronext, the transaction size is calculated in Euros using the ECB currency rate of the trading day or the last known currency rate.

1. **Order book executions** are executed orders resulting from buy and sell orders entered into the order book.

Member groups may choose either Option 1 or Option 2 for all of their trading volumes on ETFs, ETVs and ETNs. A member group may not choose separate Options for individual member codes. Member groups will be assigned Option 1 by default. To select Option 2, member groups must inform Euronext in writing 5 business days before month-end by sending the ETFs, ETVs and ETNs Non-LP tariff selection form to etf@euronext.com. The selected Option will then apply for the subsequent invoicing month.

OPTION 1	Variable charge per executed order	Minimum charge per executed order

OPTION 2		
Monthly subscription fee	€6,000

Next €600m executed (€600m - €1,200m)	0.30 bps	€0.33
All subsequent volumes ($>$ €1,200m)	0.20 bps	€0.22

A local scheme for Norwegian securities is available, and may be selected by members with at least 95% of their trading value on Norwegian securities. The scheme applies to Norwegian securities only.

- Guaranteed order book cross-trades**¹¹ are trades resulting from a dedicated cross order entered into the order book which specifies both the buyer and the seller. An ad-valorem fee of 0.15 bps is applicable per trade side with a minimum of €0.75.
- Retail Fee Package (RFP)** option available for retail executions (orders flagged as RMO "Retail Member Organisation") for members with an average trade size¹² equal or higher than €7,500 and with a RMO market share¹³ equal or higher than 1.50%: monthly fee of €7,000 + ad-valorem fee of 0.25 bp applicable per executed order size without any minimum fee.

Average Size	RMO market share %	Fixed Fee	Variable Fee
\geq €7,500	\geq 1.50%	€7,000	0.25 bps
Requirements not met		Standard Fee	

A member may move onto the RFP subject to one month's notice to Euronext. If the member wishing to enter the programme shows interest intra-month, Euronext will provide i) at least 6 months of historical data on the client's activity (on both its market share and average trade size – as computed for the RFP eligibility) and ii) guidance around the client's eligibility to the programme.

¹¹ As described in article 4402 of the Euronext Rule Book I, guaranteed order book cross-trades result from a cross order entered into the order book which specifies both the buyer and seller. These orders are permitted by the order book system during continuous trading when the price is within the best bid offer (BBO), inclusive of boundaries.

¹² The monthly average size of all RMO-flagged orders sent by the Retail Package participant, measured at the moment of their introduction on the order book. Partial execution of the order is taken into account only if the participant updates the remaining order quantity after the partial execution. In this case the sizes (i) of the initial order sent by the RMO and (ii) of the remaining order quantity resulting from the partial execution of this order and updated subsequently by the participant after the partial execution as well as (iii) of any other subsequent update(s) of this remaining order quantity will be taken into consideration as distinct sizes for the purpose of the calculation. Average size is rounded to the nearest whole Euro for monitoring and invoicing purposes.

¹³ Numerator: RMO-flagged turnover sent by the Retail Package participant on ETF & Denominator: Euronext ETF turnover

RMO market share is expressed as a percentage and rounded to two decimals for monitoring and invoicing purposes (for example 1.276% would be rounded to 1.28%).

A member that notifies Euronext of its intention to opt into the RFP will be accepted by Euronext only if it fulfils the eligibility criteria, and will benefit from the fees from the beginning of the next month as long as it meets the eligibility criteria.

4. **Block trades and other negotiated trades** are reported via the Trade Confirmation System (TCS). An ad-valorem fee of 0.15 bps is applicable per trade side with a minimum of €0.75 and a maximum of €45.00. A monthly cap of €1,000 per member is applicable.

ORDER FEE – PER DAILY EXECUTED ORDER		
Order / trade ratio	≤5	>5
Applicable fee per order	No charge	€2 (fixed fee)

In addition to the order/trade ratio, a fixed fee of €2 per order is charged for members sending orders with a nominal size below €40,000 flagged under “House” account type, on bonds traded in Continuous trading mode.

Trade fee

Bond trades are charged as a percentage of the net amount per daily executed order (please note that an order executed in two or more trades on the same day represents one executed order). The monthly nominal value is taken into account to determine the fee structure to be applied.

Bond trades are charged according to the corresponding bracket. If an executed order falls in between the brackets, the lower bracket fees will be applicable.

	Monthly nominal in €m	Charge on nominal
Bracket 1	≤ 10	4.5 bps
Bracket 2	>10 - ≤ 25	3 bps
Bracket 3	>25	1.2 bps

Minimum Activity Charge (MAC)

The MAC is applicable for Euronext Fixed Income global activity as of 1 April 2019.

Global activity means the sum of non-LP and LP activity for all member codes of a member firm.

²⁰ The initial size of a House order (corresponding to the disclosed quantity as defined in the Optiq client specifications) is taken into account to avoid charging partially executed House orders on bonds that result in remaining nominal value below €40,000.

- If a Euronext member trades less than €250,000²¹ in nominal value per month, then a MAC of €800 (excluding the order/trade ratio fee and orders below €40,000 fees) will be charged for the non-LP activity to the corresponding member for the corresponding month instead of the standard trading fees applicable to the non-LP activity²².
- Otherwise no MAC will be charged and standard trading fees will apply.
- The MAC does not impact the LP fee scheme and invoicing, which remain the same.
- Order fees are charged in addition to the MAC.

Monthly nominal value traded < €250,000	Monthly MAC = €800
Monthly nominal value traded ≥ €250,000	∅ (no monthly MAC applicable)

The total monthly amount for a Euronext member having access to the Fixed Income segment is: Trading fee generated by the nominal value traded (considering the MAC) + O/T ratio fee when applicable + Orders below €40,000 fees when applicable.

²² If the member is part of a group, the activity will be considered at a group level and the MAC will be charged to the Master Tier.

²³ The fee holiday will not apply in the case of company mergers.

The breakdown of fees is written in English.

To facilitate members' calculation of their fees for their trading in Equities & Rights, a Product Invoicing family file is available for downloading via the following https solution:

https://www.euronext.com/sites/www.euronext.com/files/ftp/MBR_FAMINSTR.txt.

This file complements the End-Of-Day (EOD) file, which provides details of ISIN codes and identifies whether trades are continuous, auction or trading-at-last trades.
