EMIR ASSISTED REPORTING

Introduction

With the entry into force of the EMIR1 Regulation (EU No 648/2012 of the European Parliament and of the Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories), all the financial transactions executed on OTC products and ETD (Exchange Trade Derivatives), have to be reported to Trade Repositories certified authorised by ESMA². This regulation aims at increasing the transparency level and reduce the systemic risk on the derivatives market. The service described in this document is offered by Euronext Clearing to its own customers in order to allow them to fulfil their reporting obligations.

Objective

This document has the objective of describing the technical and the functional features of the service.

¹ European Market Infrastructures Regulation – Regulation (EU) 648/2012 of the European Parliament and Council on OTC derivatives, central counterparties and trade repositories – also referred to as “the Regulation”

² ESMA is an Independent Authority which contributes to safeguarding the stability of the European financial system by ensuring integrity, transparency, efficiency and execution in an orderly manner of financial markets activities, as well as providing safeguards to protect investors.

Trade Repository under EMIR regulation and under the European regulation

In addition to the MiFID directive currently in force, the European Commission's EMIR regulation has been added, which details new regulatory obligations applicable to the trading of both ETD (Exchange Traded Derivatives) and OTC derivatives.

EMIR Regulation outlines a regulatory framework for ETD and OTC derivative contracts and for all the parties involved in various ways in the execution of transactions on these instruments, i.e. central counterparties (CCPs), financial and non-financial counterparties and clearing members.

Also, EMIR Regulation also defines Trade Repositories as "negotiations data repositories", responsible for collecting and storing on a centralized basis all information relating to ETD and OTC derivative instruments and the most significant changes that have occurred during the life-cycle of individual contracts and positions. Euronext Clearing's ASSISTED REPORTING service ensures that ETD transactions are sent to the client, through the automatic execution of syntactic checks, in accordance with regulatory requirements.

Description of the service

Within the scope of the ESMA directives, the ASSISTED REPORTING service acts as a Third Party between the customer and the Trade Repository. The ownership of the data and the responsibility for reporting remain with the customer who uses the aforementioned service. Transactions reporting to the Trade Repository must be made by sending a file according to one of the formats described below and according to a layout defined by ESMA EMIR REFIT VALIDATION RULE which, at the time of writing this document, is described by the spreadsheet "esma74-362-2683_emir_refit_validation_rules_reconciliation_tolerances_and_template_for_notifications_of_dq_issues.xlsx", contained in the package available at the following url:

The service will allow the customers to receive the following flows:

| Type | Format | Name conventions | Frequency |
|--------------|--------|--|--|
| Transactions | XML | CCPTRADEEMIR_X_PRO_001_CGIT_XXXX_20231020_000.xml | Daily |

Where XXXX is the member code of the customer.

All the reports sent will be validated syntactically and sent to the customer, which will provide to validate and after submit the reports to its own Trade Repository.

Assisted Reporting offers to its customers a data enrichment service based on the master data provided by the end-user at the time of the subscription to the service (described in Appendix 1). In addition, for ETD derivative contracts on instruments currently cleared by EURONEXT CLEARING, these data will be used by the EMIR Assisted Reporting service to retrieve from the Euronext Clearing database all the information relating to contracts, positions and collateral and fill them in the files to be sent to the Customer, according to the format defined by ESMA ISO 20022 and without the client being responsible for filling data into the report.

In the following diagram, based on ESMA's indications, ref. page 59 of the document "Questions and Answers - Implementation of the Regulation (EU) No 648/2012 on OTC derivatives, central counterparties and trade repositories (EMIR)", indicates which alerts will be automatically generated for the ETD on markets guaranteed by EURONEXT CLEARING:
