

Sustainability policy

Every organisation has to play its particular role in the transition to a sustainable society, depending on its impact and its opportunities. With a special position in the financial ecosystem, Euronext connects European economies to global capital markets, to accelerate innovation and sustainable growth. It has the ambition to build the leading market infrastructure in Europe and the purpose to shape capital markets for future generations.

Yet, for these efforts to truly have meaning, we need a planet that supports the very future we are working towards. Euronext is fully committed to accelerating the European trajectory towards sustainable growth, both through its own operations and through its role in empowering sustainable finance. This policy sets out our commitments which are reviewed systematically to ensure compliance with international best practices.

Responsibility

Euronext's Sustainability Policy is implemented and facilitated by the Group Head of ESG.

Scope

Euronext's ambition being to become a major player in promoting a sustainable economy, it must equip itself with the appropriate governance, strategy, and resources. In addition, Euronext must ensure that all its employees and executives are regularly trained on sustainability issues and understand the various regulatory, scientific, economic and social developments surrounding these topics. In order for the Group to adopt and maintain a business practice consistent with its ambition, Euronext has a strong governance in place.

This Policy describe Euronext's organisation to achieve its ESG commitments.
