T2S release 3.0 – Change requests focus

For the attention of:

DCPs

Priority:

HIGH

Re:

T2S release 3.0 – Change requests focus

Dear Client,

As anticipated in the recent PT-PC T2S Change Management, we wish to remind you that the upcoming 3.0 release of T2S will implement, inter alia, change request 612, the purpose of which is to adapt communication messages with T2S to the ISO 20022 – 2017 standard.

Given the particular significance of the above CR and the others already included in the 3.0 release, we believe that you will appreciate our decision to anticipate in this operational notice all currently available material regarding the change requests included in R3.0.

An additional notice indicating the defects included in the release and the module for indicating willingness to test the software will follow according to the usual timeframe.

Test plan

A notice containing any instructions received from the ECB will follow.

Test schedule

Testing in the UTEST environment will be possible starting on 22 March 2019 until, indicatively, the date of implementation of the release, 7 June 2019. Additional details will be announced in the upcoming notice regarding the full scope of the release.

Operational Notice

2 August 2018

ON_44/2018

The following message dictionary release calendar is provided for CR 612:

9/27/2018	Documentation	R3.0: CR-0612 non-binding XSDs delivery (batch 1)
10/4/2018	Documentation	R3.0: CR-0612 non-binding XSDs delivery (batch 2)
10/11/2018	Documentation	R3.0: CR-0612 non-binding XSDs delivery (batch 3)
11/19/2018	Documentation	R3.0: CR-0612 non-binding XSDs delivery (batch 4)

Relevant documentation

A folder dedicated to the 3.0 release has been created in the documents section of MT-X. This folder contains a description of the CRs included in the scope of the release and is where the dictionaries for the various messages will be published according to the availability indicated by the ECB.

The folder will be available at the following path: HOME > Docs > T2S - Release Management > T2S releases - Incidents & Problems > T2S Release 3.0
