**MonteTitoli 4U – Release into production**

Dear Client,

Further to Operational Notices 38/2018 of 20 July, 51/2018 of 11 September and 66/2018 of 9 November 2018, we are pleased to confirm the release into production of the Monte Titoli 4U platform.

Following successful internal testing and in the absence of warnings from clients during the test phase, the new platform, updated to Windows 2016, will be available in the production environment starting from Monday 17 December 2018.

Note that the Monte Titoli 4U platform, on which the Monte Titoli MT-X, X-TRM online, CLIMP and X-COM Web services are provided, has not undergone any functional changes - the changes are only technological/infrastructural. Please note also that the Internet Explorer 10 browser and all earlier versions are no longer supported.

The access link remains unchanged: <https://mtservices.montetitoli.it/PROD>.

Please use the following contact address for any support requirements:
