A2A connectivity for FIS/CPA and SHID services

To the attention of:	Intermediaries, Issuers and Service Providers
Priority:	Medium
Topic:	A2A connectivity for FIS/CPA and SRDII

Dear client,

Please note that, as part of adjustments to the Shareholder Identification project (phase 1 and 2), A2A connectivity has been developed for the standardised flows of the FIS/CPA and Shareholder Identification services, separately for issuers, their related service providers, and for intermediaries.

The A2A solution offered to issuers and issuers' service providers involves Euronext Securities Milan making available the standardised flows received from brokers on its own server, accessible via the Internet or, at the client's discretion, via a direct line at its own expense with an encrypted SFTP protocol.

The A2A solution offered to intermediaries requires that Euronext Securities Milan retrieve standardised flows from a server made available by the client via an encrypted SFTP Internet channel.

For further details, see the technical documentation published at MT-X/Doc/Technical Documentation/MT-X User Guides and Data Schemes / A2A Web Services Interface Specifications / SRDII.
