MT Release 1.3.2

Dear Client,

Monte Titoli is pleased to inform you that the upcoming 1.3.2 release of T2S will be available for external testing (in the UTEST environment) on 19 January 2018 and will be released into production on 17 February 2018.

The release in question does not currently include Change Requests and consists of 25 defects, of which 2 were opened by Monte Titoli or by its participants.

Monte Titoli will perform the tests on defects applicable to its operating model in the EAC test environment reserved for CSDs, and will also re-run the same tests in the UTEST environment.

DCPs are invited to re-test the applicable defects on their own operational model, indicating in the relevant "R1.3.2 PBI and CRs content incl declaration to test.xls" form whether they wish to proceed with re-testing and reporting on a weekly basis on the status of verification activities to the address MT-T2S-test@lseg.com.

As provided in the plan drawn up by the European Central Bank, final feedback on the outcome of the tests must be received by 9:00 on 30 January 2018. The outcome will be published in the report sent to the T2S decision-making bodies on 30 January 2018.

Market Notice

11 December 2017
MN_97/2017

Testing activities may continue after that date, until the release enters into production. Any additional evidence will be reported to the European Central Bank on an ongoing basis for the purpose of verifying the stability of the release in question.

A folder dedicated to the 1.3.2 release and containing the document cited in this market notice has been created in the MT-X documentation section.
