T2S release 1.2.2 – Release into production

Dear Client,

Following the completion of internal and external tests, we can confirm the release of R1.2.2 of Target 2 Securities (T2S) on 18 March 2017, entering into production on 20 March 2017.

In anticipation of the go-live, DCPs are invited to verify that their production configurations are correct and able, if necessary, to replicate in that environment the same situation used to test the defects that are part of the release.
